

PET EMERGENCY KIT

Disaster can happen without warning. It is always good to be prepared for the worst. SCAMPP wants to make sure that both you and your pets are safe.

THIS LIST WAS ORIGINALLY PREPARED FOR DOGS, BUT PERTAINS TO PIGS ALSO.

Food and Water

Each individual pet should have enough food and water to last them between 3 to 7 days. Don't forget to switch food out every two months to ensure freshness!

Medicines and Supplements

If your animal requires daily medication, make sure to bring it along. Keep any medications which require refrigeration or a soft-sided cooler. For supplements, bring along enough of your pet's daily dose to last up to 7 days.

First Aid Kit

For a simple, compact solution ClotIT offers a pre-packaged First Aid Kit with all the basics.

Travel Bowls

Bring the bowls that your cat or dog normally uses for their meals or look for bowls that easily fold up into smaller shapes and limit spills.

Crate, Carrier or Kennel

Shelters which allow pets, often require that they are kept in a crate for their own safety and the safety of others.

Extra Collars Leashes or Harnesses

Slip leashes are an excellent option for time-sensitive situations. When selecting a new collar, make sure important informational tags can easily transfer.

Beds or Blankets

If you can bring items that your pet is familiar with here, do so. If you can't, bring items that are easily portable that your pet can comfortably sleep on for a few nights.

Identification and Medical Records

While it is important to have your contact information on your pet's tag, make sure to include information for someone outside of the area who'd be willing to take care of your animals on a second tag.

Waste Disposal Bags or Disposable Litter Box

For dogs, make sure to have waste disposal bags. If you can, purchase disposable litter boxes for your cat.

Comfort Items

Just like Linus from Peanuts, everyone has a comfort item. These items can help alleviate anxiety during stressful situations.
